

PILOT STUDY: **Cupris Remote Diagnosis System**

Performance and Health Economic Impact

THE PROBLEM: Referral process **wastes patient's time**

There are 45 million of ENT GP visits in the UK

90% of children have an ear infection by the age of 6, 50% recurring

THE SOLUTION: Remote diagnosis and management

Cupris:

- Removes unnecessary trips to the doctor for patients
- Enables faster consultations for doctors and creates an audit trail
- Means less outpatient consultations for specialists
