Working towards integration: Advancing Care Coordination & TeleHealth Deployment (ACT) Programme

Rosemary Davidson*, Cristina Bescos** and Stanton Newman* and the ACT Consortium
* School of Health Sciences, City University London, Northampton Square, London, UK
**Philips Healthcare, Home Healthcare Solutions, Boeblingen, Germany

European Region Programme focus
Lombardy 1 Expert Patients
2 Remote patient monitoring
3 Chronic patients
Basque 4 Active Patients
Country 5 Chronic heart failure
6 Diabetes
7 COPD
8 Multimorbidty
Groningen 9 Chronic heart failure
10 Diabetes
11 Elderly care
12 Asthma/COPD
Catalonia 13 Oxygen therapy
14 Chronic care model
15 Heart failure + comorbidity
16 Comorbidities (3+ chronic conditions)
17 COPD, Diabetes, Heart failure
18 Diabetes – early diagnosis
19 COPD + Heart failure – post discharge
20 Diabetes – enhanced care
Scotland 21 Reablement & crisis care
22 Home safety service
23 Rapid elderly assessment care team

Does your service utilise Telehealth, Telecare or Telemedicine?

NO 43%
YES 57%

Barriers to implementation (all Programmes)
- Patient skills in using devices
- Lack of IT skills of GPs and elderly patients
- Lack of financial support
- Lack of a defined business case
- Lack of consensus among main stakeholders
- Health professionals and patients resistant to change
- Difficulties with team working and sharing responsibilities
- Breaking division between social and health care

Who is responsible for responding to TH data? (Frequently more than one service)

The work leading to these results is funded by the European Community’s Health Programme under grant agreement 0121209. The ACT programme is fully aligned with the European Innovation Partnership in Active and Healthy Ageing objectives to deploy integrated care for chronically ill patients.

We acknowledge the contribution of the following researchers participating in ACT: C. Westertericher (Philips Healthcare); S. Pauws, H. Schonenberg (Philips Research); P. Natsiavas, D. Filos, C. Maramis, I. Chouvarda, N. Maglaveras (Aristotle University Thessaloniki); J. Rocca (IDIBAPS); J. Escarrabill, M. Moharra (AQuAS); J. Cleland (Imperial College); D. Barrett, J. Hatfield, S. Nabb (University of Hull); N. Hart (Guy’s and St Thomas’ NHS Trust); M. David, J. Mora, E. de Manuel (Kronikgune); E. Buskens, M. Lahr (LMCG); M. Romano, M. Nalin, I. Baroni (Telbios); J. Rasmussen, A. Pavlickova (NHS 24/SCTT); S. Störk, C. Wahl (University of Würzburg).
