Environmental Design Audit Tool Questionnaire

This questionnaire has been designed for staff, ideally accompanied by a patient or relative, to complete when reviewing buildings and gardens against the design application statements.

The statements are not absolutes but rather intended to provide a helpful resource to those charged with creating supportive environments for patients, relatives and staff.

Those completing the questionnaire should indicate on the bar how they feel the facilities score against each of the main headings and the subheadings which can be found in the Environmental Design Audit Tool. The questionnaire can be repeated over time to demonstrate improvements.

1) Natural Environment

1-------------------------------------------------------------5------------------------------------------------------------------10
Reasons for this score/how it can be improved
